Several of these projects were proposed by partner agencies in the Jewish community. The Jewish Community Library received support for its Roving Readers program, which brings books, cassettes, videotapes and conversation to homebound elderly, chronically ill, and disabled clients. The Library coordinates this program with the Bay Area Jewish Healing Center, which was granted funds to expand the reach of its chaplaincy services to a variety of institutions. Jewish Vocational Service received a grant to conduct outreach to those living with chronic illness, HIV, and AIDS, to assist with their career and employment re-entry needs. The Jewish Home for the Aged successfully applied for funds to support a geriatric nurse practitioner, enabling the Home to evaluate a new model of enhanced patient care.

Jewish Vocational Service received a grant to conduct outreach to those living with chronic illness, HIV, and AIDS, to assist with their career and employment re-entry needs. The Jewish Home for the Aged successfully applied for funds to support a geriatric nurse practitioner, enabling the Home to evaluate a new model of enhanced patient care.

The Goldman Institute on Aging (GIOA) will conduct research into the range of services needed by people with dementia. The Day Health Center purchased physical therapy and rehabilitation equipment for an innovative “day health housing” project.

Another emerging theme in the delivery of health care is the ability to reach particular communities with various preventive health education measures. The Newcomers Health Program located at San Francisco General Hospital received a grant to hire Russian-speaking health educators. Many of the patients at the Refugee Clinic were formerly treated as outpatients at UCSF Mount Zion.

Women’s health continued to emerge as a significant thrust of UCSF Mount Zion. The GIOA secured funds to evaluate the effectiveness of a health education program targeted specifically to African-Americans, while the San Francisco Immunization Coalition was granted money to assess the disparities in immunization rates for this same community. A grant to the Cancer Risk Program at the UCSF Mount Zion Cancer Center allowed them to hire an educator to provide community lectures that will increase knowledge and awareness of hereditary cancer risk.

The Jewish Home for the Aged successfully applied for funds to support a geriatric nurse practitioner, enabling the Home to evaluate a new model of enhanced patient care.

Exploring ways of improving elderly care was the focus of several other grants. The Goldman Institute on Aging (GIOA) will conduct research into the range of services needed by people with dementia. The Day Health Center purchased physical therapy and rehabilitation equipment for an innovative “day health housing” project.
